H. B. Garling,

*Members of the Institute of British Architects.*

LONDON AGENTS

for the Sale and Laying of Maw & Co.'s Pavements,  
W. B. SIMPSON & SONS, 456, WEST STRAND, W.C.

LONDON.

1862.

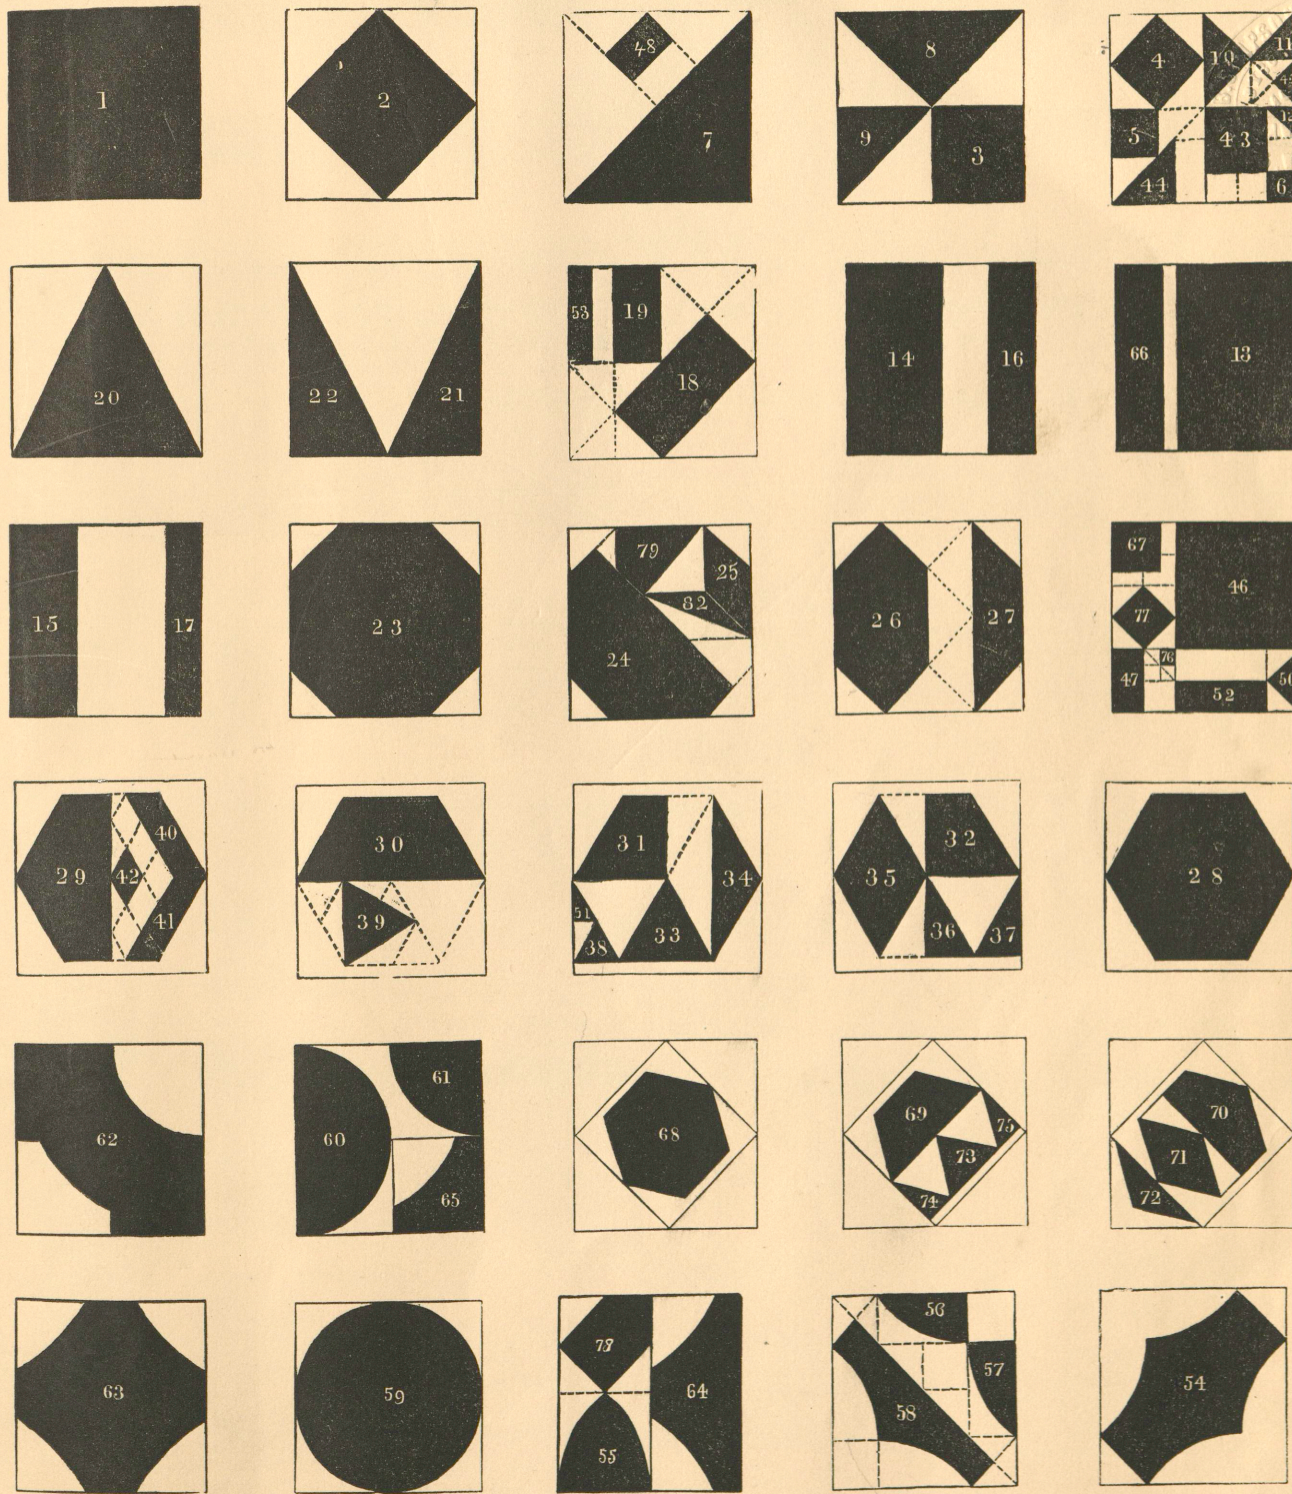

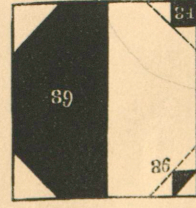

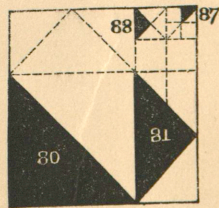

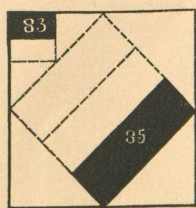

*Diagrams showing the mutual relation of the various forms and sizes of Tiles and Tesserae of which the accompanying Designs are composed, for the assistance of Architects and others who wish to arrange their own Designs.*

Scale, two inches to a foot, or one-sixth the actual size; twice the size of the coloured Designs in Plates 1, 2, 3, 4, 6 and 8; and eight times the size of Designs in Plates 5, 7 and 9.

The figure No. 55 is inscribed on a 3" base within a 3" square. The curved lines being struck with a  $3\frac{3}{4}$ " radius.

Nos. 56 and 57 are halves of 55, used in the section of general pattern of Design No. 30, against border also in the

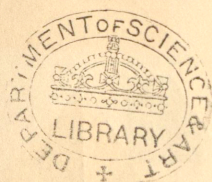

composition of general patterns of Designs Nos. 33, 34, and 35.

The curved lines in No. 54 fit those in No. 55. This figure is exactly three-fourths the length and half the width at the widest part of a 6" square, placed diagonally.

No. 58, the longitudinal half of No. 54, is used in the section of the general pattern of No. 31, against border.

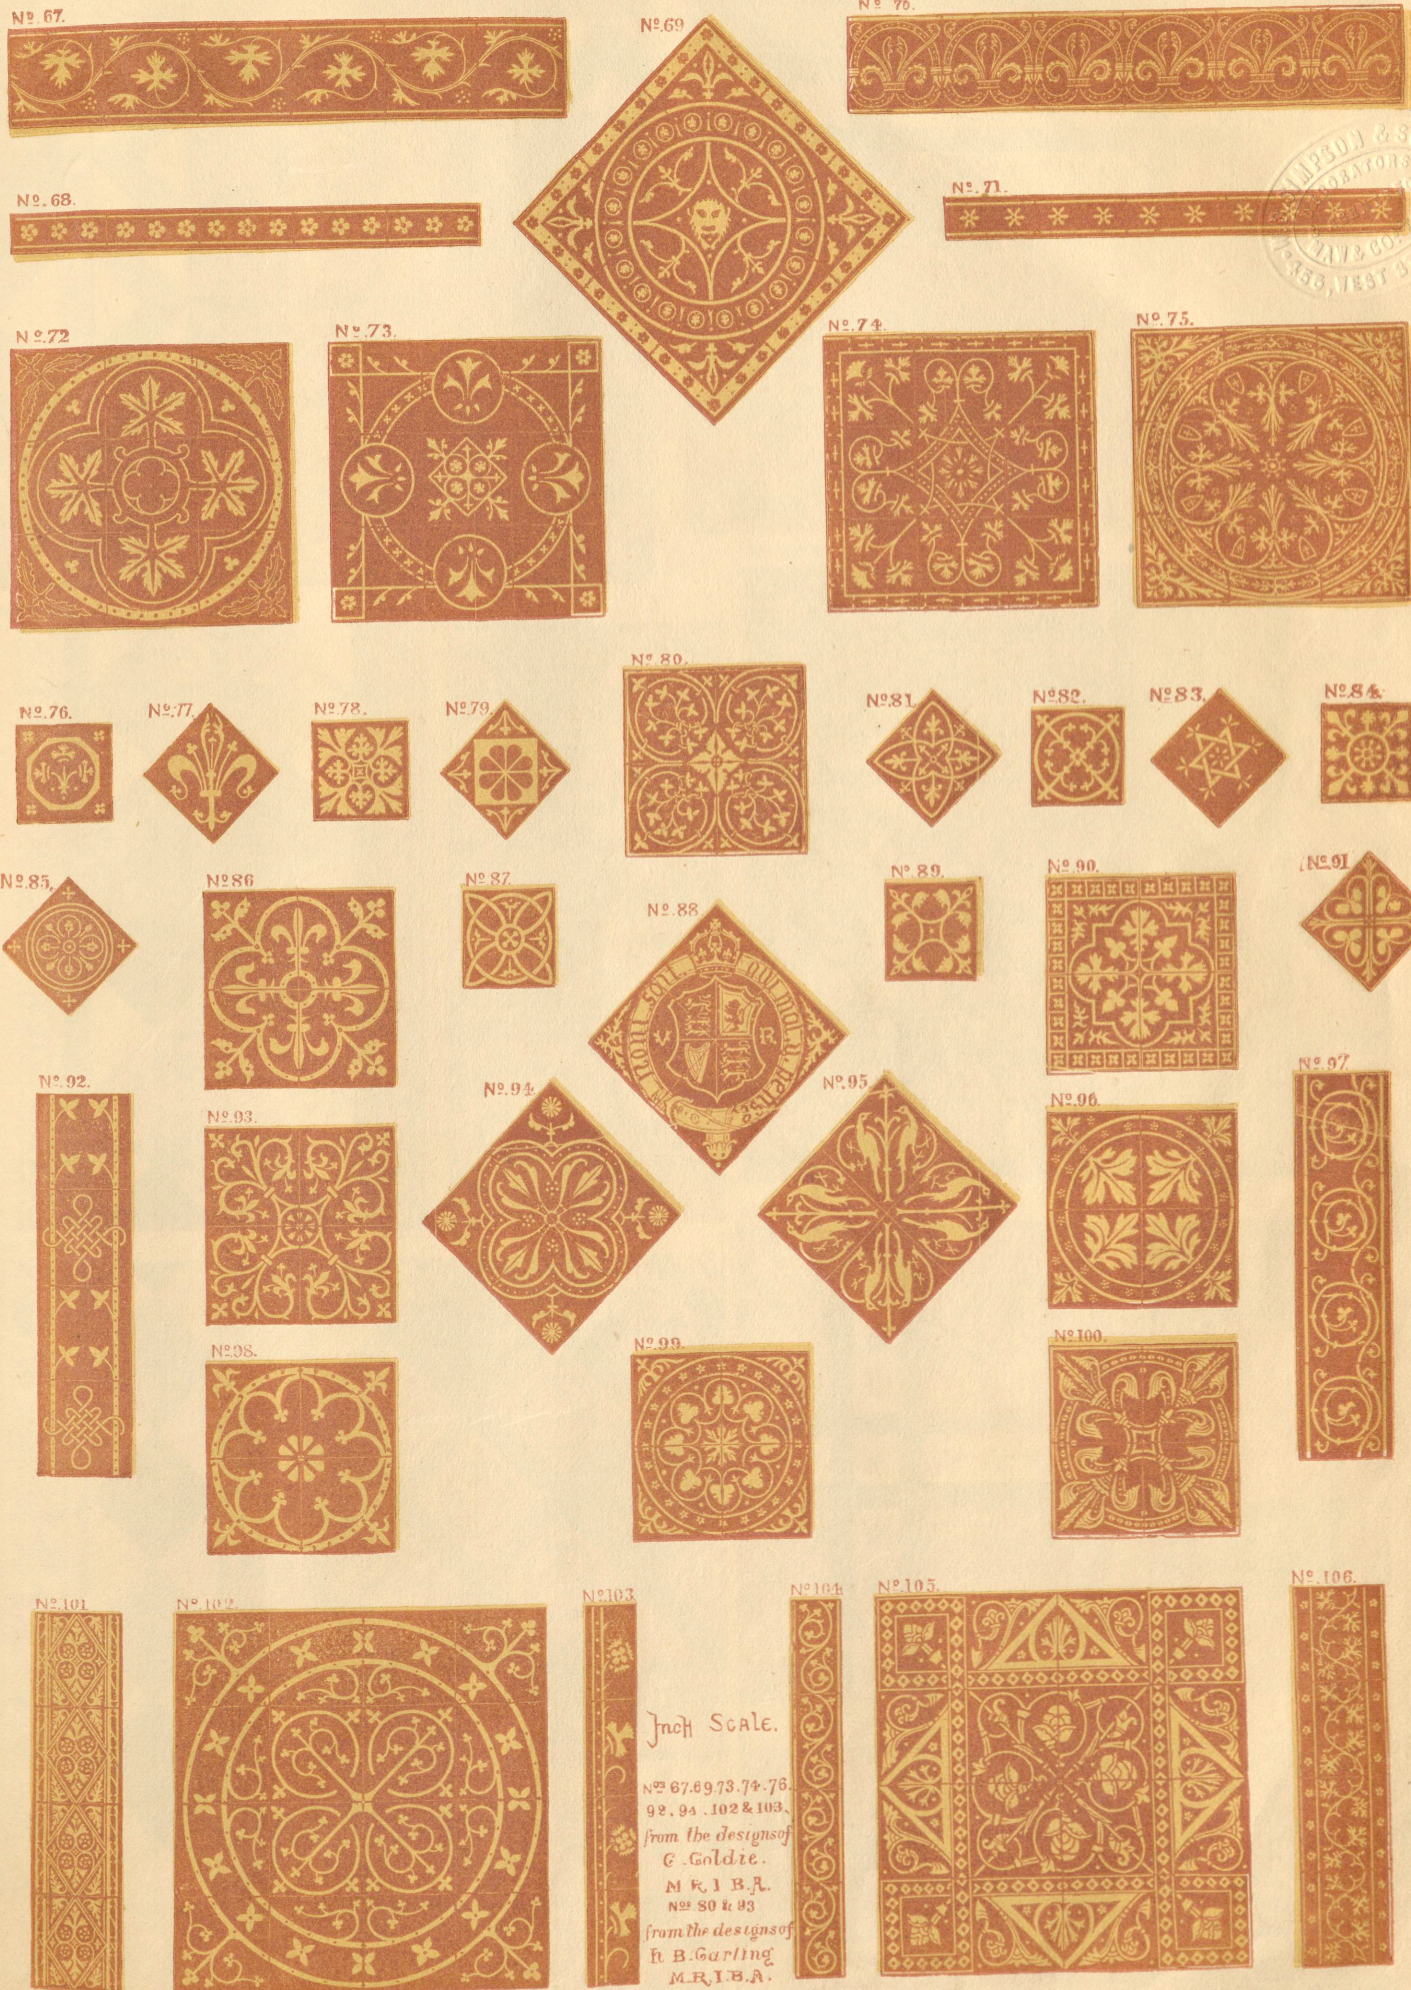

The straight sides of the Figure 62 are 3" in length, and curved lines are struck with a 3" and 6" radius respectively; the former fitting the curved sides in Figures 59, 60, and 61; the latter, the curves of 63, 64, and 65.

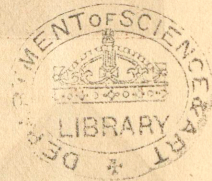

5

most of the above 6 inch Tile patterns are manufactured as 4 1/4 x 4 1/4 Tiles
